

# VTRS340S

## *Range Improvement and fire protection System*

The VTRS340S was created to improve deployable range building and alteration capabilities for combat engineers. The VTRS340S can be specially modified to fit the complexity and broad range of each unit's mission.

- ✓ Advanced and basic equipment ideal for multiple terrains
- ✓ Can be modified to suite customer requirements
- ✓ All safety equipment meets federal OSHA requirements
- ✓ Multiple accessories to enhance mission capabilities
