

PANDEMIC, DISASTER PREPAREDNESS, MEDICAL WAREHOUSING

**YOUR SUCCESS
IS OUR MISSION**

Are you tasked with increasing your response cache? Many VISNs we currently work with are finding it difficult to make room for increased demand. Enclosed in this newsletter you will find two examples of contracts VSS Logistics is currently executing for the VA in the deep south and mid-west. We have seen the requirement of supplies on hand be moved from a 15 day supply to a 60 day supply making it almost impossible to store on site the needs you currently have. In the uncertain times we are committed to bringing certainty to this area so that as a team we can ensure our Veterans are taken care of and you have what you need when you need it.

**YOUR SUCCESS
IS OUR MISSION**

“Kim and Kenny [VSS Program Management Office] have continuously stepped up to show their commitment not just to Lockheed Martin, but to the warfighter. VSS Logistics understand that the end user is what matters, stepping up in the face of multiple hurdles and challenges. Staying CALM in the face of an uphill climb, organized, professional and NEAT in their communication; true VIPs. Kim is always accessible at any time (day or night), managing the arduous effort of staffing a growing workforce. Kenny’s passion for excellence shows every day, stepping in and diving right in to solve problems on-site and work hand in hand with the boots on the ground to get the job done. Both continue to go above and beyond to ensure support of the USAF IPV Gen III Program does not falter. We are honored to work with you both, and appreciate all that you have done and continue to do.”
